There are three major types of devices for church use: e-readers, tablets and smartphones.

E-Readers

E-reader devices are designed to take the place of a paper book. They simulate white pages with black text print. This is much easier on your eyes for longer reading sessions and the battery lasts much longer.

Because these devices lack color and are specialized for reading books, **LDS apps and videos do not work on e-readers.**

The Church provides e-books of the scriptures and many other publications to use on an e-reader. Think of e-readers as a very easy way to carry and read your entire library of books, including those from the Church!

Tablets

Tablets have color touch screens in various sizes. These devices can use LDS apps and videos for your study and presentation during lessons at church.

While not as kind to the eyes for lots of reading, tablets provide the full experience of the apps from the Church.

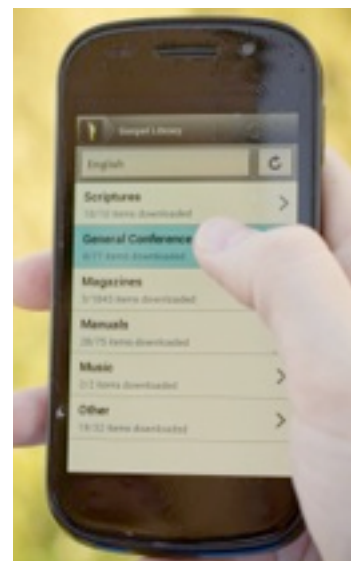

Apps like the Gospel Library provide links between the scriptures and manuals. You can also record your own highlighted notes that will be synchronized to your account on lds.org.

The LDS Tools app provides member directories and calendars.

Smartphones

Smartphones work almost the same as tablets, just with a smaller screen. Like tablets, they support LDS apps, video and note taking.

Questions?

Ask questions about devices, LDS apps and how to use them of your fellow ward members.

Contact Your Ward Clerks or Bishopric for more information on getting the most out of LDS apps and information on your devices.
